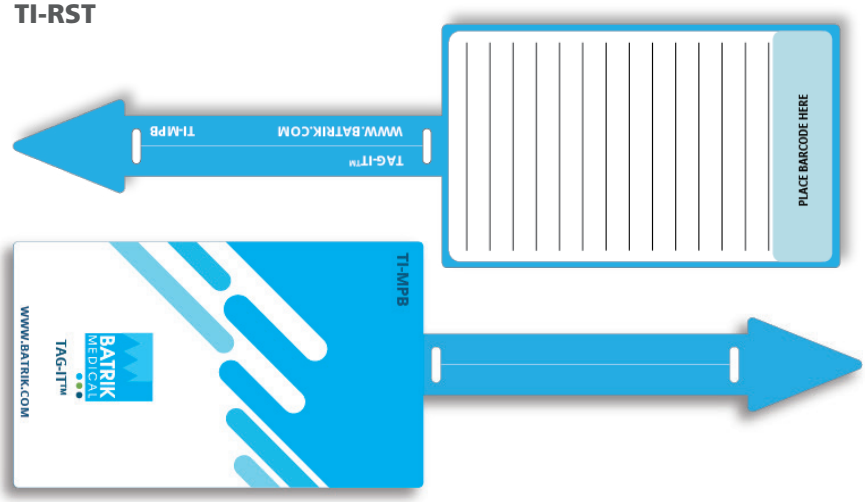
BATRIK

TAG-IT™ | SCOPE REPROCESSING

Batrik Scope Reprocessing Tags are durable and can withstand handling during reprocessing **without tearing,** ensuring that information remains intact. These tags are vital in recording important information such as **date to reprocess on, scope model and serial number, sterilizer type, meeting sterilizer parameter conditions, alcohol flush, and hang date**. These tags have been meticulously designed to elevate **operational efficiency** and contribute to the delivery of the highest standard of patient care.

TI-RST



TI-MPB

*Suitable for various information tagging purposes

LOGGING IMPORTANT INFORMATION

- Easy for staff to indicate when the scope was processed
- Key scope, technician, and cycle-related information easily reported and identified.

SMART DESIGN

- The self-looping design allows for easy attachment to the scope
- No requirement for extra fastening materials
- Secure fastening as the loop is tightened around the instrument
- Features an integrated barcode area
